Application No.: 10/543,076 Docket No.: 13555-00001-US
Amendment dated December 17, 2007

Response to Office Action dated September 17, 2007

AMENDMENTS TO THE CLAIMS

Listing of Claims:

- (Cancelled).
- (Previously presented) An assay for testing a sample for the presence or absence of
 inhibition of the enzymatic conversion of 1-hydroxy-2-methyl-(E)-butenyl 4-diphosphate into
 isopentenyl diphosphate and/or dimethylallyl diphosphate comprising the following steps:
- (a) reacting an aqueous mixture containing 1-hydroxy-2-methyl-(E)-butenyl 4-diphosphate, a 1-hydroxy-2-methyl-(E)-butenyl 4-diphosphate reductase, NAD(P)H, flavodoxin, and a flavodoxin reductase under predetermined reaction conditions for a predetermined period of time:
- (b) analyzing the reaction mixture obtained in step (a) for the consumed amount of 1hydroxy-2-methyl-(E)-butenyl 4-diphosphate and/or NAD(P)H and/or for the produced amount of isopentenyl diphosphate, and/or dimethylallyl diphosphate and/or NAD(P)[†];
- (c) repeating step (a) in the presence of the sample to be tested;
- (d) repeating step (b) with the reaction mixture defined in step (c);
- (e) comparing the results of steps (b) and (d).
- (Previously presented) The assay according to claim 2, wherein the consumed amount of NAD(P)H is measured photometrically.
- (Previously presented) The assay according to claim 2, whereby in steps (b) or (d) the
 produced amount of NAD(P)⁺ or isopentenyl diphosphate and/or dimethylallyl diphosphate is
 tested.
- (Previously presented) The assay according to claim 4, wherein the produced amount of NAD(P)⁺ is measured photometrically.
- 6. (Previously presented) The assay according to claim 2, wherein NADPH is used as said

Application No.: 10/543,076 Docket No.: 13555-00001-US

Amendment dated December 17, 2007 Response to Office Action dated September 17, 2007

NAD(P)H.

- (Previously presented) The assay according to claim 2, wherein after the predetermined period of time the reaction is stopped by addition of trichloroacetic acid.
- 8. (Previously presented) The assay according to claim 2, wherein steps (a) and (c) are carried out at 37°C for 1 hour under aerobic conditions.
- (Previously presented) The assay according to claim 2, wherein steps (a) and (c) are carried out under anaerobic conditions.
- (Previously presented) The assay according to claim 2, wherein said 1-hydroxy-2methyl-(E)-butenyl 4-diphosphate reductase is IspH.
- 11. (Cancelled).
- 12. (New) An aqueous mixture comprising 1-hydroxy-2-methyl-(E)-butenyl 4-diphosphate reductase and a flavodoxin
